

Yukon Wild School

EXPERIENTIAL SCIENCE ENRICHMENT + OUTDOOR ADVENTURE 2-DAYS/WEEK

This two-day a week program is designed to give your learner an enrichment opportunity academically while also being physically demanding. At the core of this program is experiential science inspired by the world around us. Students will explore a variety of field studies in Yukon's diverse landscapes. Numeracy and literacy are strategically applied throughout daily lesson plans. Students will be challenged in a variety of leadership and problem solving tasks making this a holistic program for families who demand more from their child's educational experience. Curriculum areas explored include Science, Art, ADST, PE & Core Competencies. Outdoor adventures will be tailored to group interest and will include hiking, biking, canoeing & nordic skiing. A year-end 5-day wilderness canoe trip is possible depending on interest.
